EXPERIENCES

Atriume, NJ — Software Engineer

2019 - PRESENT

Used modern frontend development frameworks to build and maintain performance and scalable web apps as well as responsive user experiences.

Participated in the full end-to-end software development life cycle,, from planning, designing, implementation, testing, delivery, monitoring & maintenance.

Worked closely with the design team to build out intuitive and scalable designs that work across multiple platforms and devices..

Participated and led meetings, status updated, report analysis with project managers and other developers.

Tested frontend in multiple browsers to ensure cross-browser compatibility and all functionalities across the site and ensured everything worked as expected.

Built custom responsive sites from scratch with HTML, Javascript and CSS utilizing best practices and web standards.

Mentored and coached software engineering interns to ensure they get the help and support needed to deliver and achieve the goals for each task assigned.

Tech/Tools: React/Redux/Hooks, Nextjs, Javascript, HTML, CSS, LESS, Styled-Components, Cypress, Mysql, Postman, Git, AWS Ec2, S3, Codecommit, Codepipeline
